

BI-FOLD AUTOMATIC GATES

www.talbotautodoors.com.au

Space Saving Innovation

We believe that with property sizes getting smaller, you need to make optimum use of your space. The bi-fold swing gate was designed specifically with space constrained properties in mind allowing you to have an automatic gate and still have room to park your car.

Unique trackless system

Our unique trackless bi-fold system was designed and manufactured in-house, making us the only company offering this service in Australia. The beauty of the trackless system is that it can be installed almost anywhere, even on properties with sloping and uneven driveways.

Custom Fabrication

All of our gates are custom made to order which allows our customers ultimate freedom of design when it comes to their gates. We use 3mm thick aluminium framing on all of our gate designs and stainless steel components for our bi-fold kits which ensures the durability and strength that Talbot gates are renowned for.

Full Service

In addition to our bi-fold gates, we are happy to supply and install matching pedestrian gates and fencing. We can also install compatible receivers to allow your garage door and new gate to function using only one remote. Our friendly staff will be there with you every step of the way; from helping select the right gate design, to ensuring the final installation is completed to our high quality standards.

Why Choose Us?

- Australian owned & operated since 1985
- Innovative solutions designed on a project by project basis
- Proven reliability with over 30 years experience installing doors & gates.
- Franchise network of highly skilled and knowledgeable installers throughout Sydney.
